Deveron Reports Continued Revenue Growth in Q2

Toronto, Ontario - Deveron UAS Corp. (CSE: DVR) (“**Deveron**” or the “**Company**”) a leading agriculture digital services and insights provider in North America, is pleased to announce revenue growth of 54% year over year to \$1,123,867 in Q2 2020. This marks a major milestone for the Company, as it has successfully sold over \$1 million in products and services for the first time in one quarter since the Company’s founding.

Second Quarter 2020 Financial and Operational Highlights

The Company’s financial performance improved over the previous year’s quarter, driven by higher margin data insight solutions, led by the Company’s acquisition of Texas based Better Harvest, and the doubling of farm acres serviced from its data collection division. For the three-month financial results ended June 30, 2020 (and comparable period ended June 30, 2019):

- Revenue grew 54% year over year to \$1,123,867 in Q2 2020, from \$727,973 in Q2 2019
- Revenue from US operations grew 361% to \$595,696 in Q2 2020
- Total comprehensive income for the period was \$76,223

“Our second quarter results illustrate the success of our growth strategy which is underpinned by three key focus areas: organic growth, productization of our offerings and acquisitions,” commented David MacMillan, Deveron’s President and CEO. “In the quarter, we were able to successfully integrate our Texas acquisition, Better Harvest, which doubled the acres we influence in the US and increased our US revenue by 361%. This year we have made investments in our sales team and marketing efforts which significantly impacted our sales funnel and activity ahead. Additionally, investment in our data collection network earlier this year has help secure nearly double the volume in both drone and soil sampling orders compared to this time last year. Looking forward to the next 6 months, our goal is to continue accelerating the success of this strategy while also focusing on some new digital tools and offerings that we believe will continue

to leverage our ability to scale and service more and more customers throughout North America’s farm sector.”

Summary of Financial Results

Results of Operations	For the three months ended		For the six months ended	
	June 30, 2020	June 30, 2019	June 30, 2020	June 30, 2019

Per Share:				
Comprehensive Net Gain (Loss)	\$0.00	\$(0.00)	\$(0.01)	\$(0.03)

Operational Highlights for Q2:

In the second quarter, Deveron was able to achieve key objectives and successes that had a positive impact on the Company’s trajectory:

- On April 7, Deveron closed a private placement for \$655,000 by a group of strategic investors led by Bill Linton. Mr. Linton was appointed as a Director and non-executive Chairman of the Board. Mr. Linton is an experienced director and private investor and currently serves on the Boards of TMX Group (TSE: X), Empire Company (TSE: EMP.A) and CSL Group. He has invested in several successful private companies and retired in 2012 as the CFO of Rogers Communications.

- On April 17, Deveron closed the 2nd tranche of a private placement for \$700,000, which combined with the first tranche, Deveron issued 13,550,000 Units for aggregate gross proceeds of \$1,355,000.
- On May 11, Deveron acquired Better Harvest, a Texas based agronomy solutions firm further expanding its US footprint by over 100,000 customer acres. Better Harvest had unaudited reported revenue of \$471,769 USD in 2019.
- On June 18, Deveron announced the national launch of a plant tissue testing service in collaboration with A & L Canada Laboratories to continue to build on the Company's turn-key data collection offering. Tissue sampling complements other progressive precision agriculture programs and is a value-add to traditional soil sampling.

Subsequent to Q2

- On July 7, Deveron announced that it is providing a turnkey data service program to Terramera, a global ag-tech leader fusing science, nature and artificial intelligence to transform how food is grown. The collaboration allows Terramera access to Deveron's drone data network to provide high fidelity insight on numerous sites across Canada and the United States

Business Outlook

"The second quarter affirmed our beliefs about the value that our products and services provide our customers," commented David MacMillan, Deveron's President and CEO. "As engagement within our sales pipeline continues to grow and our team continues to push efficient turn around from the field to the creation of tangible data that helps leaders in agriculture make better decisions, we only see our success accelerating. With a quarter under our belt of our integration of Better Harvest and increased activity in the United States, we see a lot of opportunities to consolidate a fragmented service market and align great businesses toward a common goal of providing better, unbiased information to improve efficiencies on farms. We are looking forward to a busy fall and have already seen increased demand as the soil sampling season gets underway following wheat harvest across a number of our operating nodes. Finally, although COVID-19 has challenged our ability as a company to deliver our services, to date we have not experienced any major impact on our business activity."

The Management's Discussion and Analysis for the period and the accompanying Financial Statements and notes are available under the Company's profile on SEDAR at www.sedar.com.
